

January 2024

REACH Statement

REACH Regulation (EC) No. 1907/2006 The European Regulation concerning the registration, evaluation, authorization, and restriction of chemicals ("REACH") provides a special procedure for the handling of substances that are said to bear a very high risk for health and the environment. Those substances of very high concern (SVHC) are included in Annex XIV of the REACH regulation. They have been published since October 2008 in the candidate list of SVHC for Annex XIV of the REACH regulation.

The European Chemical Agency (ECHA) as of the 1st of January 2024 has an additional 22 substances added to the candidate list bringing the total to 255.

This Regulation establishes specific duties and obligations on companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or articles.

- Under the structure of the REACH Regulation, Silclear Ltd is a downstream user, manufacturer, and supplier of "articles" to our EU customers.
- According to the information provided by our suppliers, no substances listed in the updated list of SVHC are contained within Silclear products in concentrations above the threshold limit of 0.1%.
- Silclear Ltd is constantly monitoring the substances of very high concern (SVHC), as defined by REACH, in our products.
- Silclear Ltd customers can also visit the following website to get the most up-to-date information on the current list of SVHCs under REACH:
